

## Why RemitPro?

**Affordable, innovative and flexible products**

**Back-office system integration**

**Complete security and peace of mind**

## eSettlePro

### The single point of connectivity with settlement banks

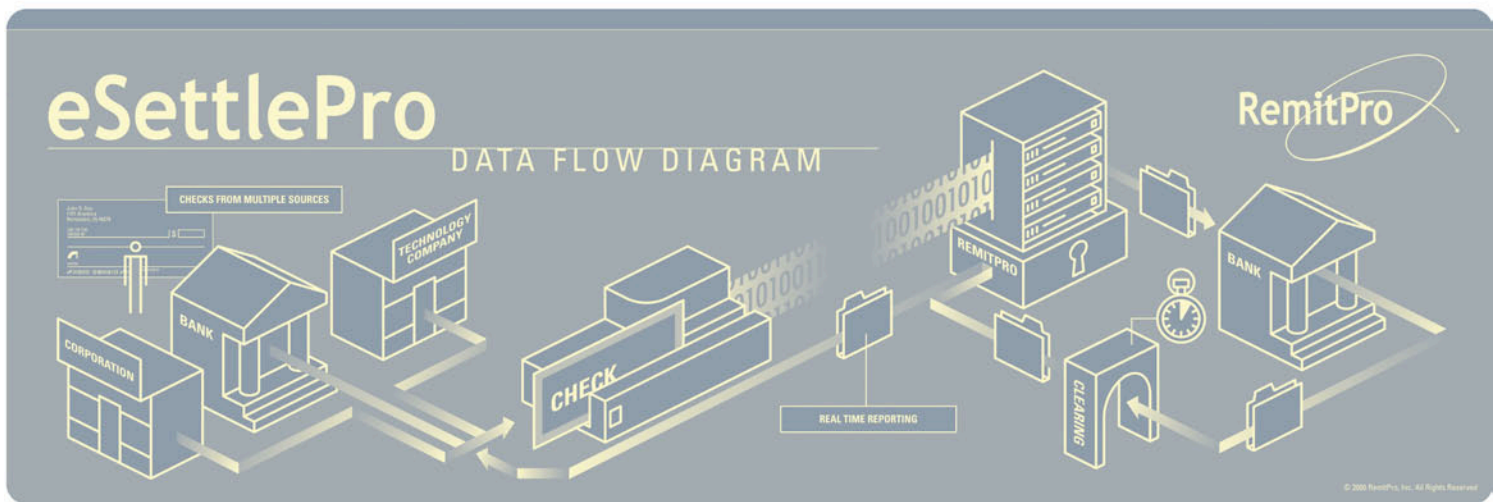

**eSettlePro** is a software program that has the unique functionality of being the “hub” through which third parties can transmit Check 21 files to banks for settlement. This allows you to capitalize on the connectivity RemitPro has established with settlement banks.

### The benefits of eSettlePro to third-party software providers and corporations:

- Eliminates the inefficiencies of establishing and maintaining connectivity with multiple banks
- Offers the flexibility of choosing from a vast selection of banks, which makes your marketing efforts stronger
- IT resources aren't tied up interfacing with multiple banks

### The benefits of eSettlePro to banks:

- Streamlines Check 21 operation since banks receive the transactions for settlement processing from RemitPro in the format they define
- Eliminates the inefficiencies of establishing and maintaining connectivity with disparate third parties
- IT resources are more cost-effective because they're used for core banking activities

For more details on how eSettlePro can help you, call 877-861-0005 or e-mail [info@remitpro.com](mailto:info@remitpro.com).
